

SUBASH SEKAR

Python Full Stack Developer

✉ subashsekar117@gmail.com 📞 +91 8438420257 🌐 subash-github 🔗 subashLinkedIn

Professional Summary

Python Full Stack Developer and AI/LLM Engineer with 2+ years of experience building scalable web applications and intelligent systems using Django and FastAPI. Experienced in designing RESTful APIs, microservices architecture, and developing AI-driven applications using Agentic RAG pipelines. Skilled in building AI agents with LangChain, integrating multiple LLM providers, and implementing function calling and tool orchestration. Strong foundation in distributed systems, caching, asynchronous processing, and applying data structures and algorithms in real-world backend systems.

Technical Skills

Programming: Python, Java
Web Development: FastAPI, Django, Django REST Framework (DRF), HTML, CSS, streamlit
Databases: PostgreSQL, MySQL, MongoDB, Supabase
AI & LLM Technologies: OpenAI, Gemini, Claude, Llama, RAG, LlamaIndex, Qdrant, DSPy, Embeddings, Prompt Engineering
AI Agents & Systems: LangChain, Agentic RAG, Function Calling, Tool Integration, Multi-Agent Systems
Distributed Systems: Redis, Celery, Caching, Task Queues
DevOps & Tools: Docker, Git, GitHub, Postman
System Design: Load Balancing, API Gateway, High Availability, Fault Tolerance
Testing: PyTest, Unit Testing
Data Structures & Algorithms: Hashing, Graphs, Queue (FIFO), Sorting, Recursion

Professional Experience

Python Full Stack Developer Jan 2024 – Present
Conin Technologies Pvt Ltd, Hyderabad

- Developed and deployed MediMind AI, an AI-powered healthcare platform using LLMs and agentic workflows
- Built scalable applications using Django and FastAPI
- Designed and implemented RESTful APIs for frontend-backend communication
- Architected microservices-based backend systems for scalability
- Implemented asynchronous processing using Celery and Redis
- Developed AI agents using LangChain for multi-step reasoning and automation
- Built Agentic RAG pipelines using Qdrant and LLM-based contextual retrieval
- Integrated multiple LLM providers including OpenAI, Gemini, Claude, and Llama
- Implemented function calling and tool orchestration for AI-driven automation
- Developed authentication systems using JWT, OAuth2, and RBAC
- Applied hashing for caching and performance optimization
- Designed graph-based workflows for AI agent execution

Projects

MediMind AI – AI-Powered Healthcare Platform

Tech Stack: FastAPI, Django, JavaScript, LlamaIndex, Qdrant, OpenAI, Redis, Celery, Supabase, Docker

- Built REST APIs using FastAPI and integrated with frontend dashboards
- Implemented Agentic RAG pipelines for intelligent document retrieval
- Developed AI agents for clinical workflow automation
- Integrated multiple LLM providers for query handling and summarization
- Implemented asynchronous background processing using Celery
- Designed secure authentication using JWT, OAuth2, and RBAC
- Applied graph-based workflows for agent execution pipelines
- Used tree-based parsing for document processing in RAG
- Optimized performance using caching (hashing) and queue-based systems

LeadGenie – Smart Lead Management Platform

Tech Stack: Django, DRF, HTML, CSS, JavaScript, PostgreSQL, Docker

- Developed a full-stack CRM system to manage lead lifecycle including creation, tracking, and reporting
- Built RESTful APIs using Django and DRF for frontend and third-party integrations
- Implemented role-based access control (RBAC) and secure authentication mechanisms
- Optimized PostgreSQL queries, improving application performance and response time
- Designed responsive UI components for efficient data handling and user experience
- Containerized the application using Docker for consistent deployment

Education

MBA – Management Information Systems & Marketing
SRM Institute of Science and Technology, Trichy

June 2022 – May 2024

Certifications

- AWS Machine Learning Specialty – Udemy
- AWS Cloud Practitioner – Udemy
